Location: Vancouver, BC

As a Full Stack developer, I am familiar with popular online and mobile app technologies and programming languages like JavaScript (ES6), React, and Node.js. I am committed to developing high-quality, user-friendly online apps, and I embrace challenges as opportunities to learn and grow beyond my current capabilities. Having Prior experience working in teams and collaborating with designers to accomplish project goals.

## EXPERIENCE

### **EZPill, Vancouver** – *Frontend developer*

September 2022 – February 2023

- Developed and maintained the user interface for multiple web applications using HTML, CSS, and JavaScript.
- Implemented new features and functionality using JavaScript, and optimized existing code for improved performance.
- This project facilitates medicine delivery by enabling pharmacists to manage orders and select delivery details through a portal.
- [www.ezypill.com](http://www.ezypill.com)

### **Orsi, Tehran** – *Frontend developer*

August 2020 – September 2021

- Developed websites using JavaScript, HTML, and CSS.
- Designed website layouts and elements using Figma, Photoshop, and Illustrator.
- Collaborated with other team members, such as graphic designers and developers, to create visually appealing and functional websites.
- Communicated with clients to gather requirements and discuss project progress and updates.

## Projects

### **CrowdEase, Langara College** – *Full stack developer*

January 2023 - April 2023

- Worked on a mobile app project using React Native.
- Utilized RESTful APIs to retrieve and send data to the server.
- Integrated React Query
- Utilized MongoDB as the database of choice and used Mongoose to simplify CRUD operations and enforce data consistency and structure.
- Hosted the backend system on AWS
- Collaborated with the development team to plan, assign, track, and supervise team-member work using Jira. Utilized Github to store scripts and track platform issues.
- <https://crowdease.ca/>

### **Tie-in, Langara College** – *Full stack developer*

September 2022 - December 2022

- Utilized ReactJS framework for front-end development, and, Implemented ReactQuery library for data fetching, caching, and server state updates
- Employed SASS for structured and maintainable styling
- Integrated Firebase Auth service for user authentication management
- Utilized Node.js framework for back-end service and Express Js to create REST APIs and endpoint exposure and Selected MongoDB as the NoSQL database
- Deployed the front-end and back-end services using Netlify and Render, respectively, and created a CI/CD pipeline using GitHub branches
- Participated in agile development methodologies such as daily stand-ups, sprint planning, and retrospectives.
- <https://tiein.ca/>

### **My Green, Langara College** – *Frontend developer*

May 2022 - August 2022

- Developed features by vanilla Javascript
- Used firebase Auth for login and signup
- Implemented a serverless backend using Firebase Functions and Firestore for data storage.
- Employed SASS for styling
- Worked as a member of the scrum team, using Trello for task tracking
